

Reach

Deliver and measure high-impact, continual learning campaigns seamlessly

For compliance owners who need to deliver, communicate and report on programme performance; Catalyst Reach is a powerful learning system designed by E&C experts to prioritise ease of implementation and high quality learner experience, for anyone and anywhere

Built for compliance

Catalyst Reach is a compliance learning system for creating and managing E&C training programmes. Using a comprehensive set of tools, you can deliver training that is easy for learners to access, complete and react to. In addition, you can save time and increase awareness by automating the communication and delivery of the curriculum while centralising your programme.

Ethics and compliance training is different than other employee learning and development initiatives. Because of its unique requirements, it should not be treated the same way.

Unlike a corporate-wide LMS, Catalyst Reach has been designed to promote ethical culture while meeting evolving regulatory guidance. Our solution provides a clear distinction between E&C training and other corporate training, a key regulatory requirement.

Helping your E&C programme to run smoothly

Ensure that continuous learning reaches all your employees, without hours of manual maintenance or administrative headaches.

Scalable development of compliance training

Choose from our extensive library of award-winning courses and easily modify them to personalise content, look and feel for your learners. Use intuitive administration features to seamlessly enrol learners and automatically assign courses; creating a central access point for your entire compliance programme in our newly designed User Console.

Reliable automation

Create and deliver continual learning campaigns that run according to customised assignment rules and unique milestone events, triggering automated communications.

Easy integrations

Easily manage users with continuous bulk loading of HRIS data and ensure convenient access for your users with SSO. Catalyst Reach also integrates with other LRN Catalyst products and/or any LMS.

Amplify compliance. Activate culture.

Deliver high-impact learning seamlessly to promote ethical culture and task completion.

Elevate programme awareness

Leverage multi-channel, pre-built communications that you can quickly design, brand and deploy. These professional-looking communications bring awareness to your programme and give learners access to relevant training virtually anywhere: desktop, offline, mobile, or through an app.

Monitor your programme

Access dashboards for quick, high-level visualisations into your programme and empower supervisors to drive course completion with easy-to-read Manager's Reports. Easily export reporting data to share with key stakeholders outside of the Catalyst Reach software.

Turn data into decisions

Get a critical insight through question, regional and user levels of reporting. These crucial insights enable you to identify hotspots, understand status and measure overall effectiveness.

Key facts you need to know

Our LMS is built to provide a great experience for both learners and administrators. Here are some additional ways in which we make it easier to run your programme.

Access on web, mobile, or offline means you can reach all your learners wherever they are.

Courses auto-save and can be restarted on web or mobile devices for a better, more practical learner experience.

Our platform meets current accessibility guidelines and conforms to WCAG 2.1 Level AA standards.

Our global technical support team is available 24/7.
