Catalyst LMS

Catalyst

# Designed with your learners in mind

Catalyst LMS is an all-encompassing learning management system built specifically for developing an effective ethics and compliance program. Designed by E&C experts to help compliance leaders build ethical cultures while meeting evolving regulatory guidance, our LMS lets you create, manage, deliver, and analyze your training program efficiently and effectively.

Built for compliance

Ethics and compliance training is different than other employee learning and development initiatives. Because of its unique requirements, it should not be treated the same.

Unlike a corporate-wide LMS, the Catalyst LMS was designed to drive ethical culture, while meeting evolving regulatory guidance. Our LMS provides a clear distinction between E&C training and other corporate training, a key regulatory requirement. Created by a team of E&C experts, Catalyst LMS is updated regularly to align with ever-changing federal guidelines.

The Catalyst LMS puts your team in the best position to meet your E&C KPIs, goals, and objectives. With control over training targeting and communications, as well as easy integration with certifications, disclosures, and analytics, E&C teams can ensure that their programs are effective, defensible and audit-ready.

Flexible education management

Customizable course content

Choose from a large library of courses that you can easily edit and curate to create an engaging E&C experience that resonates with learners and meets your specific objectives

Robust reporting and analytics

Enhance your program using customizable reporting and analytics—at the question, regional, and user level—that can identify hotspots, reduce risk, and measure overall effectiveness.

Effective learner communications

Engage your learners wherever they are using sleek, multi-channel communications that you can quickly design, brand, and deploy.

Reliable automation and support

Rest easy knowing the Catalyst LMS runs itself—including reporting, uploading user information, syncing with HRIS data, and assigning courses. If you do encounter an issue, our global technical support team is available 24/7.

Helping your E&C program run smoothly

Select
Choose from our library of learning experiences to build an impactful and engaging program.

Customize
Personalize learning content and your learner site to create an authentic experience for your learners.

Communicate
Communicate and create awareness using pre-written, editable messages about required actions.

Automate
Reduce manual tasks with automated communication, reporting, course assignment, and learner enrolment.

Integrate
Make management easier with SSO, bulkloading of HRIS data, and seamless integration with Catalyst products like Analytics or Disclosures.

Analyze
Access reporting and analytics to identify hotspots, reduce risks, and help improve program performance.

Powering over 1,000 ethics and compliance programs.

Driving 10,000,000 course completions annually.

Key facts you need to know

Our LMS is built to provide a great experience for both learners and administrators. Here are some additional ways we make it easier to run your program.

Access on web, mobile, or offline means you can reach all your learners— wherever they are.

Courses auto-save and can be restarted on web or mobile devices for a better, more practical learner experience.

Our built-in Manager's Report tool enlists supervisors to help drive completions.

Our LMS meets current accessibility guidelines and conforms to WCAG 2.1 Level AA standards
