

ANALYTICS & REPORTING DEMONSTRATE IMPACT AND IMPROVE YOUR E&C PROGRAM

In order to build a program that is highly effective and complies with regulation, you need data driven insights into program foundation, but also into program impact. Our analytics and reporting provide powerful E&C program information like where employees are struggling and overall program effectiveness.

ENABLING YOU TO

- Capture learning interactions
- Understand course results
- Focus on knowledge retention
- Demonstrate efficacy
- Identify learning gaps
- Observe chosen pathways
- Accelerate E&C program performance

Our solution supplies a critical, holistic view of program performance summarized within your specified time ranges across key data points enabling you to understand employee interactions, outcomes, and plan for the future.

Visualize and analyze progress and performance with flexible insight into completions, time spent on lessons, test-out, branching, and content interactions.

Knowledge Checks identify questions where users are making the wrong choice and provide clarification in-course to fill the content gap. This will help users answer questions correctly and reduce the overall attempts metric.

Quizzes allow you to measure knowledge after time has passed after training. This data provides critical information about material recall and is an important data point to show and improve program effectiveness.

1.21 Average Attempts		Lesson: Responsible and Effective Business Communication	
Which of these business communications is responsible?			
Answer Option(s)	Results	% Learners Selection	
Her actions were both illegal and immoral.	✗	4.80%	
She violated the law and common decency.	✗	2.93%	
I have concerns about her behavior and would like to discuss them.	✓	95.73%	
She completely ignored the company code and the advice of legal counsel.	✗	12.80%
